

AI-powered insurance policy checking solutions

Check policies with unsurpassed quality, accuracy and efficiency.

Patra's **Policy Checking AI** is the industry-leading solution designed to ensure the accuracy and quality of bound policies. Featuring Patra's proprietary patent-pending AI, ML, and NLP technology, best-in-class workflows, and comprehensive checklists, Patra's **Policy Checking AI** leads the industry with unsurpassed quality, accuracy and efficiency.

Patra's patented process prioritizes accuracy and completeness while reducing rework and review time for agencies. Its 900+ point checklist ensure discrepancies are quickly identified and shared via color-coded error report summaries for account managers to easily scan and assess.

Workstream flexibility

Workstream flexibility enables insurance organizations to select the optimal blend of technology and human expertise for each situation. Patra's **Policy Checking AI** offers adaptable solutions from fully automated AI-only review to customized white-glove service with human oversight.

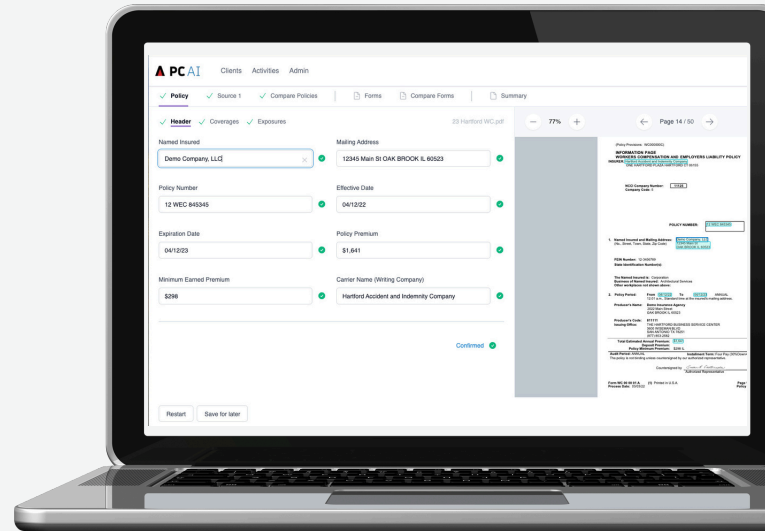

Policy Checking AI solution options

AI-Only: Streamlined solution using sophisticated AI algorithms to extract, analyze, and compare policy data without human review. Ideal for organizations seeking accelerated processing while maintaining internal oversight.

Self-Service: Equips in-house teams with industry-leading AI automation through an intuitive interface. Extracts, compares, and highlights discrepancies between policy versions with unparalleled speed and accuracy.

Full-Service: Combines AI technology with dedicated Patra processing executives who manage the entire process. Includes final human oversight and E&O risk transfer for every policy checked.

Custom: White-glove service with tailored workflows, customized quality control, and specialized reporting aligned with your unique requirements. Includes complete E&O risk transfer and full process management.

Advanced AI-powered automation

Patent-pending technology

Intuitive data extraction via patent-pending AI/ML technology

Standardized workflow

Step-by-step workflow delivers consistent, high-quality output

Comprehensive policy review

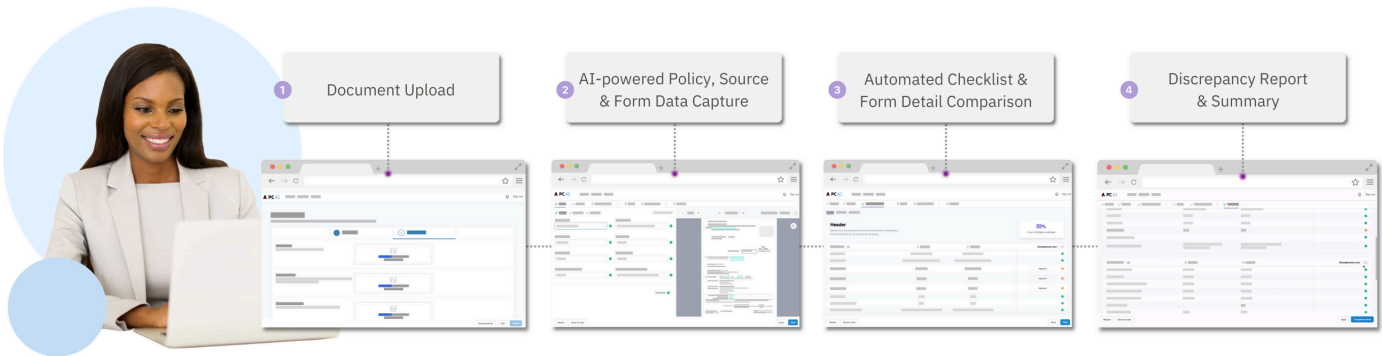

Detailed review of policy header, coverage and limits, exposures, and form schedules

Discrepancy report and summary

Color-coded report for easy review, research, and reporting

Step-by-step automated processing

Workstream flexibility options
